

IXP Tools Hackathon Projects

- Universal looking glass
 - Load MRT dumps from any collector and query it "looking-glass style"
- Bird's eye
 - An API (and UI, and CLI) for insight into BIRD
- Remote Peering Jedi
 - Detecting remote peers at IXPs and geolocate them
- Peer Match-making
 - What peerings may be useful for me?

IXP Tools Hackathon Projects

- IXP Valuator
 - Measure the IXPs' role in connecting local eyeballs with local content
- PeerMe ("make peering great again")
 - Discover and generate possible peering (configurations) between ASNs
- Pinder (Tinder for Peering)
 - Swipe Right On A New Peering Relationship
