

What do we want?

and when do we want it?

Alexa 100
is dual stacked

IPv6 is 50%
of my network traffic

IPv6 is 100%
of my network traffic

IPv6 is 50%
of Google's traffic

50% of home networks
dual stacked

50% of enterprise
networks dual stacked

App Store requirement

What is the goal?

By when do we need to achieve it?

What is the effect?
